

Elegant. Luxurious. Hand-crafted.

This is a Percy-Built shoe.

Though people aren't built to often notice their own feet and shoes, that same drawback compels everyone else's vision to travel to your own footwear, and believe us, they are looking. Don't ruin the look of a tailored, expensive suit with a second-rate pair of shoes manufactured for the masses and with it, your only chance to make a first impression. Garner success with a shoe instantly recognized as exquisite. Whether you need a lightweight summer dress shoe or a heavy-duty daily business shoe, our handcrafted shoes impart an exceptional impact.

Since your footwear is one of the first things that others observe, it is the one thing that should be refined, as it pulls an outfit together and signifies your connection to the earth. But sophistication does not equal discomfort. Just as a custom-tailored suit is made for your comfort, so are our shoes. When you slip your feet into our handcrafted shoes and experience the indulgent richness of Corinthian woven leather enclosing your feet, you will be transported to your own instant paradise! You'll look good, your feet will feel good, and people will notice. Trust us.

From our measuring system that guarantees a perfect fit for both feet to our premium leather soles that flex naturally with the motion of your feet to full leather linings that allow your feet to breathe easier—Percy-Built shoes offer the ultimate in discriminating comfort and taste.

We craft our shoes using only the finest, natural material and highest-grade leather. Material and craftsmanship for which others charge more than \$1000. But Percy-Built shoes afford you that same high quality for under \$250 and encase your feet in luxury known to only a select few.

Know that every feature of our shoes has been passionately positioned for your ultimate comfort, and know that we put as much effort into crafting our shoes as you put into crafting your image.
